***Election/Restrictions***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-7, drawn to combining an array for processing data with a sequential processor, classified in class 712, subclass 10.
  - II. Claims 8-9, drawn to memory access of a processing array, classified in class 712, subclass 14.
  - III. Claims 10-11, drawn to multi-tasking and multithreading in a reconfigurable array of data processing elements, classified in class 712, subclass 15.
2. The inventions are distinct, each from the other because of the following reasons:
3. Inventions I, II and III are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct if they do not overlap in scope and are not obvious variants, and if it is shown that at least one subcombination is separately usable. In the instant case, subcombination I has separate utility such as coupling of a processing array to an instruction pipeline of a sequential processor. See MPEP § 806.05(d).
4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, have acquired a separate status in the art because of their recognized divergent subject matter, and the search required for each group is different from others, restriction for examination purposes as indicated is proper.

Applicant is advised that the response to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

5. A telephone call was made to Michelle M. Camiaux on 07/06/2007 to request an oral election to the above restriction requirement, but did not result in an election being made.
